

Ayala Systems: Offshore Software Development

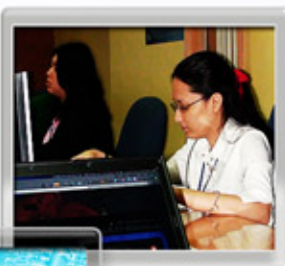

"Everything should be made as simple as possible."
- Albert Einstein

Offshore Software Development

Today's business requires extremely powerful technologies to win over competition. Speed and clever use of information technology has become a key competitive advantage for those who know how to use the power of technology.

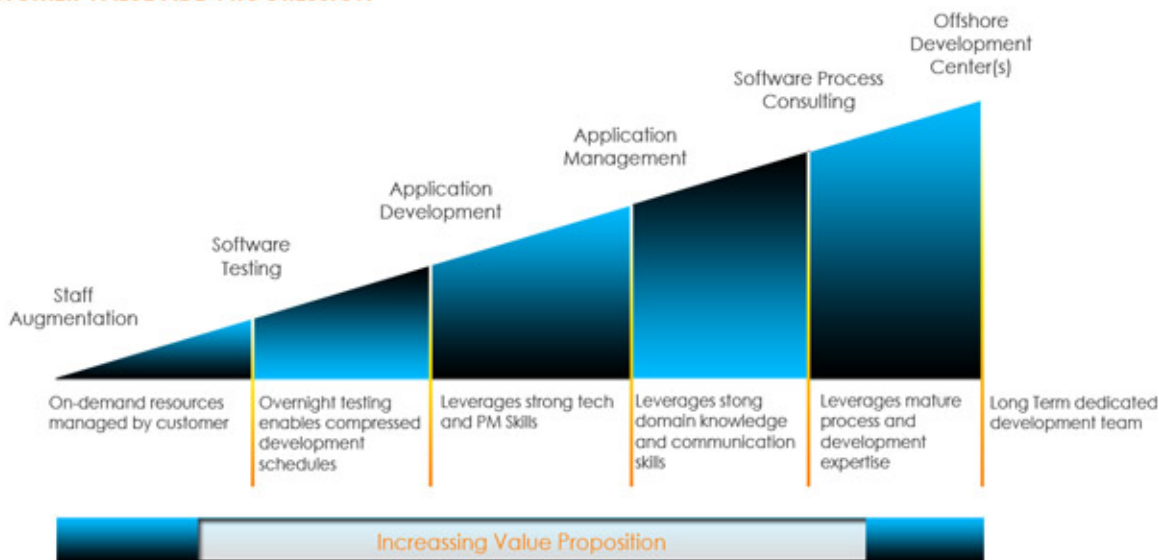

We thrive on extremely fast paced software development using the best available technologies in the global and open community. We combine our software engineering capabilities with the customers' stated business goals to create the solution they can use one week after – not after several months and several iterations of software development cycles. We deliver today what our customers will need tomorrow.

Ayala Systems: Offshore Software Development

```
setCardDao(Map<String,IGeneric  
Dao> setCardDao){  
    this.setCardDao = setCard  
    Dao;  
}  
public static void  
    public void  
setCardMapper(K  
setMapper: CardMapper<O
```

SUCCESS STORY

- A key member of the global outsourcing strategy for a major Japanese bank which is the world's biggest MySQL database live installation. This team is composed of an on-shore and off-shore team totaling close to 100 Software Engineers.
- Designed, developed and maintains the Philippine government's electronic procurement web-based portal-a project hailed by the World Bank and Asian Development Bank for its significant benefit in promoting transparency.
